# EXPERIENCE

### PROJECT MANAGER                                      2018-2024
SELF-EMPLOYED

Managed software development projects and consulted B2B companies with up to 2K employees. Led the remote management of diverse R&D teams (up to 50 members), focusing on risk, scope, time and cost management, effectively guiding project roadmaps:

- E-commerce cloud solution for the leading heavy-truck car manufacturer (Germany): orchestrated the development of mobile B2B marketplace application for online purchases across 150+ dealerships in EU.
- Statistics consulting company (Israel): managed web-applications development, ensuring compliance with FDA standards for electronic data capturing (clinical trials in 10 Israel and US hospitals with over 2K experimental patients).
- Non-profit religious organization (Israel): launched mobile and web applications (up to 50K users), resulting in a digital library comprised 30K+ podcasts, classes, lectures, and educational programs.
- Social network startup (Montenegro): improved organizational R&D processes based on Agile methodology, increased delivery cycle performance up to 20%, improved transparency and tasks priorities pipeline by implementing PM tools: Jira/Confluence, TestRail, CI/CD.

### TECHNICAL PROJECT MANAGER                           2017-2022
STOPS.COM (AUGMENTED REALITY SOCIAL NETWORK STARTUP), ISRAEL

Established and led the R&D team and technical solutions architecture for the mobile product with estimated MAU 2M users:

- Assembled the 10-member R&D team and orchestrated the end-to-end development workflow utilizing Jira/Confluence, TestRail, CI/CD tools.
- Managed technical and architecture vision and strategy of B2C & B2B product development.
- Launched the MVP to 2K end-users collaborating with 5 travel operators in US, UK and Israel.
- Implemented a cross-cloud scalable solution spanning AWS, Azure, DO, Google Cloud, capable of supporting up to 20K concurrent users.

### TECHNICAL PROJECT MANAGER                           2016-2017
RAVTECH (SOFTWARE DEVELOPMENT), ISRAEL

Managed mobile and web development projects as well as establishing long-term relationships with startups:

- Launched B2B2C mobile application offering indoor navigation services e.g. airports and shopping malls (product was acquired by Google Cloud in 2020).
- Deployed mobile/web applications for a medical personal device, enabling online tracking of health indicators, integrated with doctors' web applications, contributing to a comprehensive home hospitalization solution.

### SYSTEM ANALYST -> PROGRAM MANAGER                   2009-2016
ROSBUSINESSCONSULTING (TOP-5 MEDIA HOLDING WITH 1.5K EMPL.), RUSSIA

Established and led the Project Office (7 project managers and 100 developers), streamlined the R&D team, implemented resource and risk management systems, enhanced transparency in task prioritization:

- Led a portfolio of up to 25 concurrent projects spanning various domains: e-commerce, B2C mobile applications, business and entertainment media.
- Achieved a doubling in development speed, a remarkable 60% increase in internal customer satisfaction and reduced R&D staff retention by 50%.
